

CCI - HWK

Vocational Training Improvement Project

Overall Objective

Better-trained skilled workers in the construction sector contribute to building a Green Economy and strengthening the Sri Lankan economy.

Key Indicator 01

80% of CCI members rate vocational and in-company training as improved by 2025.

Key Indicator 02

Apprentice numbers in the construction sector increase by 10% at selected training providers by 2025.

Project Results & Indicators

Result 2:

Enhanced Training in Green Construction Professions

- ✓ At least 2 new training courses piloted in construction crafts with a focus on the green economy.
- ✓ Selected VET centers enhance practical curricula/materials for energy-efficient and sustainable construction.
- ✓ A “Community of Practice” networking concept for vocational teachers and trainers is developed and initiated.
- ✓ Advisory resources provided for SMEs to improve resource & energy efficiency.
- ✓ Increased company participation in vocational training.

Result 1:

Improved Capacities for Training Trainers

- ✓ 50 vocational schoolteachers trained in technical, methodological, and didactic aspects.
- ✓ •50 in-company trainers trained in practice-oriented methodologies.
- ✓ Continuous training of trainers integrated into strategic planning of selected training providers.
- ✓ 5 pilot activities using innovative, digital training methods (e.g., LMS, YouTube webinars, trainer visits).

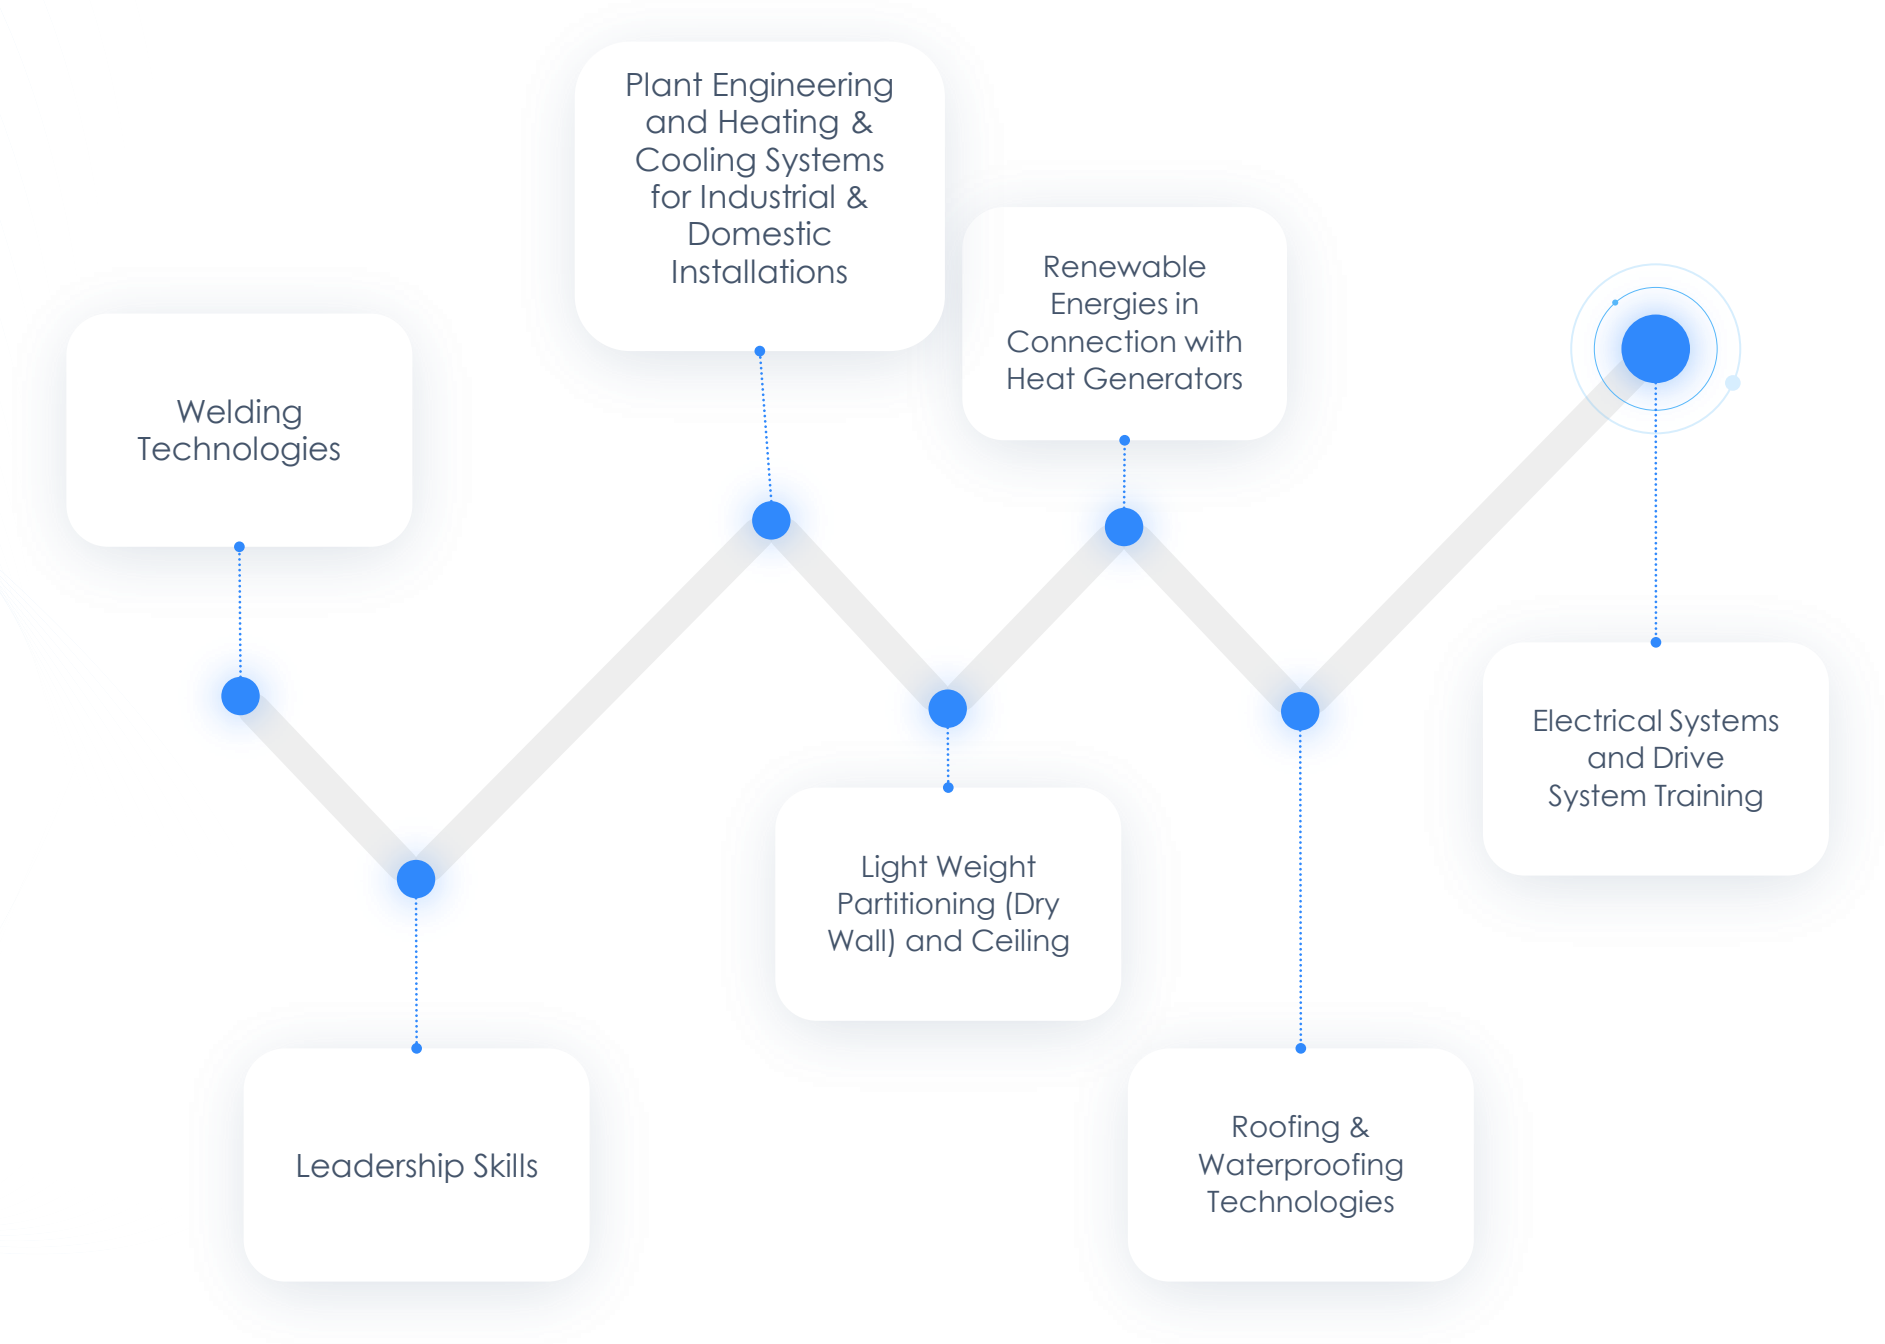

Result 3:

Enhanced Social & Cultural Image of Vocational Training

- ✓ 5 measures implemented to boost the recognition of in-demand construction trades, with a focus on women’s inclusion (e.g., image campaigns, career events, Girls’ Day).
- ✓ Strengthened role of the Sri Lanka Chamber of Construction Industry in public dialogues on vocational training.
